

## Sunlight Sauna ~ New Wooden Model

Soothe your aching joints with Sunlight Sauna's new wooden model, suitable for outdoor or indoor use. The sauna uses Solocarbon™ Technology with infrared light emission, the same healing energy that the sun releases naturally. Priced between \$3,500 and \$6,500, this sauna features a CD player with Blaupunkt speakers, a flat screen television and an MP3 connection for PC and iPod stereo use. Great for healing and rejuvenation, the company claims the sauna will lower blood pressure and cholesterol and promote weight loss. A 30-minute session burns approximately 285 calories. The sauna will be available early September. For more information, visit [www.sunlightsaunas.com](http://www.sunlightsaunas.com).
