

WHERE THE ADVENTURE NEVER ENDS

MENZ

Sunlight Saunas

Unlike conventional saunas that use convection heat, Sunlight Saunas use infrared light—the same healing energy that is released naturally by the sun. With sheer indulgence in mind, Sunlight Sauna's line of wooden models feature a CD player with Blaupunkt speakers (used by BMW), a flat screen television and an MP3 circuit for PC and iPod stereo use. Unlike conventional saunas that must be integrated into the plumbing and electricity systems, Sunlight Saunas are free standing and therefore require very little maintenance. They are also energy efficient, using a regular household outlet and running on less electricity than an average hair dryer! www.sunlightsaunas.com
